CRB-BCRH	\$7.95

CRB EPOXY WARMER

CRB's Epoxy Bottle Warmer is used to increase the viscosity of all liquid style epoxy finishes and glues. The unit will accommodate up to 32oz kits, and the included basket allows the warmer to be used with smaller sizes as well.

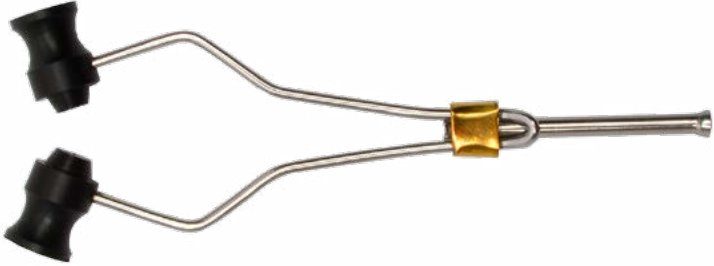

Stock #	Price
CRB-BWRM	\$34.95

CRB Deflection Graph Kit

The CRB Deflection Tool and Chart gives builders the ability to conduct expert "side by side" comparison of rod blanks to locate even the most subtle differences in power or action. Whether you are trying to match a new build to your favorite old rod or trying to fine tune the perfect rod for your next build the DFT-KIT will offer the professional advantage to builders of all skill levels.

Stock #	Price
DFT-CHART	\$49.95
DFT-KIT	\$69.95

CRB Thread Inlay Bobbin

This innovative tool is designed to assist builders while doing decorative inlays. This tool is best for wraps using multiple inlays, the notched spool holders are specially design to allow for a rod band to sit in place and hold the bobbin on the blank and out of the way during the wrapping process.

Stock #	Price
CRB-INBB	\$9.95

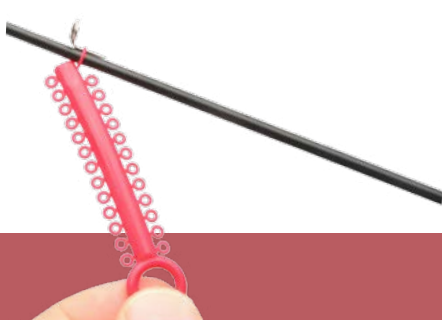

CRB Micro Guide Bands

Whether you're spacing, adjusting, or wrapping micro guides, this tubing features a superior stretch to work all the way down the diameter of the rod blank and a slim design to make wrapping up the guide a breeze.

Simply detach each tube as needed for a quick and convenient application that will keep your micro guides in place and your work space clutter free.

Stock #	Price
CRB-INBB	\$9.95

GAFFS & GIGGS

CRB Custom Gaff Kits & Components

Build your own High Quality custom gaffs! CRB has designed Gaff Handles specifically made for gaffs. Not just a rod blank to stick a hook into. These gaffs have a heavy walled handle with spiral cut grooves inside the front end to give you a better hold on the hook. All Gaff Handles are available in 5'6" lengths to allow you to build a 6' completed gaff or cut the handle to any desired length to make it perfect for the application you need.

Custom Builder™ Gaff Building Kits

- All the necessary parts to build your gaff, including:
- (1) 316 Stainless Steel Hook
  - (2) EVA Foam Grips (18" kit includes 1)
  - (1) Heavy-walled handle tube with spiral-cut glue reservoir
  - (1) Rubber butt cap

Custom Rod Builder IM-6 Graphite Fast Action Color Blanks

These high quality rod blanks are comparable to the offerings from major name brand manufacturers. Because of a bulk-purchasing agreement with a major manufacturer we cannot disclose the source, but we promise you'll build great rods on them. These models are constructed of the new industry-standard IM-6 graphite to guarantee a high-strength low-weight rod. All of these blanks are finished in gloss black, pink, purple, blue, green, orange, yellow, and lime. These blanks are a great bang for your buck.

Take the guesswork out of building great rods!

Whether you're new to rod building or you've wrapped a hundred rods, it can be a daunting task to select the right components for your custom fishing rod. These guide setups were hand-picked by our experienced Pro Staffers to get you wrapping (and fishing) your next fishing rod in no time.

- Pre-selected by professional custom rod builders
- Black or Chrome color options
- Stainless Steel for superior corrosion resistance, strength and durability
- Concept-Style layouts
- Press-Fit ring & frame (Performance & Elite)
- Pre-ground feet for smooth and easy wrapping
- Hook keeper included
- Industry-leading 1-year limited warranty

NEW

HANDLE SYSTEMS

CRB Handle System

Mud Hole's Custom Handle System is designed from the ground up exclusively for custom rod builders. Designed by experienced rod builders to meet the same exacting standards as their Japanese counterparts, our handle kits are mounted on a 1K Twill Woven Graphite tube and feature Fuji® deluxe graphite reel seats.

Every handle system comes with your choice of high quality Portuguese Cork or EVA grips and is accented with machined aluminum trim parts, available in 6 anodized colors. Select from several fine pre-assembled handles or mix and match the Handle System parts to create your own custom handle

10" Carbon Ice Rod Handle Mounting Tube

Tired of the grips and reel seat on your ice rod separating under load? We have come up with a solution to stop this annoying problem. Build your complete handle on this carbon tube and then just glue the tube over the butt of your Ice Blank. This 1/4-inch OD graphite tube will not flex during use and will allow your handle components to stay firmly together.

Stock	Size	Price
IRHT-10	10"	\$3.95

Get A Grip on It! Split Grips vs. Standard Grips

One of the biggest trends in today's fishing rods is the split grip. Why? Well, for many years the demands have been to go lighter & more sensitive. The split grip allows you to only put grip material where your hand will actually need it. This means that on a standard 9" rear grip you might remove 6" of material. It also allows you to shape the grip to fit your hand better than a straight conventional one does. One of the drawbacks of a split grip is that you might actually need that material weight to aid in balancing the rod. Another drawback is that a split grip handle doesn't work well in a rod holder.

Split-Grips

Used for both rear-grips & butt-grips  
The RSG series of grips feature a unique flare and works universally well as both a butt grip as well as a rear-grip.

Model	Length	I.D.	O.D.	Description	Price

Gyotaku Fish Decals by Marshall Madruga

All decals are full-color and printed in UV-resistant ink, as well as laser cut for minimal background color. Decal sizes vary by the fish, but are approximately 1". Artist-designer, Marshall Madruga created this special product line by combining his lifestyle and unique artwork. Marshall Madruga is a master in the Japanese technique of Gyotaku (gyo=fish / taku=impression). Paint is applied to a REAL FISH and then the fish is printed on a special Japanese rice paper. Using a REAL FISH keeps the artwork anatomically correct and very unique. Marshall has printed everything from marlin and tuna to trout and bass.

# CRB Rod Building System

The Tool You Start With - The System You Grow With

The 8-in-1 Rod Building System has 8 of the most valuable rod building tools to have in your shop.

## RBS Hand Wrapping System - #RBS-KIT2

The RBS is the first of its' kind, a fully expandable and upgradeable unit that will grow with the needs of the user. The RBS is the first and last tool a rod builder will ever need. The included Aluminum Base Station is the platform which the CRB Rod Building System is built on. When fully assembled this unit has over 8' of working space. The base also features dual roller tracks, allowing trays to roll in the front or rear of the wrapper as well as a center track which is used to mount support stands anywhere along the length of the station. The included HWS-1 hand wrapping unit features a dual spool tensioner and a tension rod which allows for easy reversing while building. Thread then runs to the slider which can move seamlessly along the 10" wrapping base. Also features adjustable stands mounted to the base along with a third stand for supporting the butt or tip.

Details: RBS-KIT2 Includes CRB Hand Wrapper and 8ft Aluminum Base Station

Stock#: RBS-FINISH

### Finishing Tray

The Finishing Tray travels with you while putting the final touch on your latest build.

Details: Also fits ATC power wrapper.

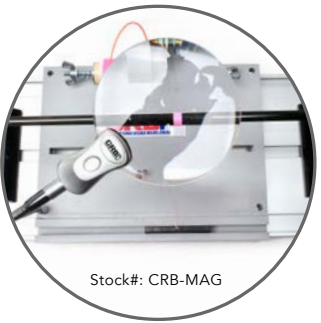

Stock#: RBS-TOOL

### Tool Tray

Keep track of you tools, parts and pieces with the Tool Tray add on.

Details: Also fits ATC power wrapper.

Stock#: CRB-MAG

### New! Led Magnifier

The LED Magnifier is perfect for all forms of wraps and other detail work.

Details: Mounts to HWS & Finishing Trays.

HSMAG2	\$15.95

Laser Alignment System

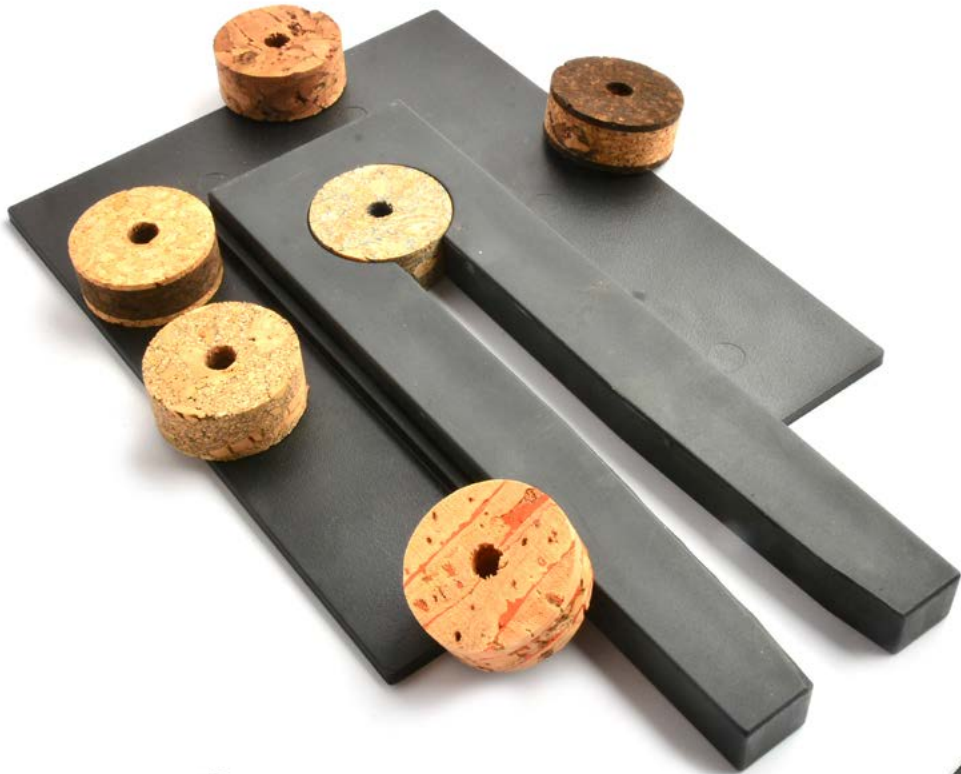

Properly aligning guides can be one of the most tedious tasks when building a custom rod. The CRB Laser Alignment System features a reel foot mount mounted laser housing with vertical beam, leveling bubbles and reversible tape measure. Once mounted, a perfectly straight beam is projected down the rod all the way to the tip. The vertical laser makes aligning guides and buttwraps a snap. While fishing rod blanks are not as straight as a laser, this tool will greatly aid you in aligning your guides.
